Research Detectives' New Episode: Solving the Pain Problem

Premieres Tuesday, May 14th

MIAMI, FL – While pain medications are designed to alleviate discomfort, they come with significant concerns, including addiction, overdose, and various side effects – collectively known as the “Pain Problem.” The upcoming episode of [Research Detectives](#), introduces viewers to scientists dedicated to unraveling this issue by enhancing the understanding of pain science and body’s pain signaling mechanisms. The episode will also spotlight researchers exploring drug cravings and tolerance, aiming to develop pain medications that maintain effectiveness without increasing dosages.

Research Detectives, developed in partnership with The Wertheim UF Scripps Institute, ventures into the depths of medical research. This [series](#) provides insights into the significant scientific endeavors aimed at finding effective treatments for devastating diseases, such as Alzheimer’s and cancer.

Don’t miss the premiere of *Research Detectives’ “Solving the Pain Problem”* on Tuesday, May 14th at 7 PM, on the Health Channel.

The [Health Channel](#) is available on Xfinity, Hotwire, Blue Stream Fiber, Breezeline, or streaming for free on platforms like [Mometu](#), [HeroGo TV](#), [MEGOGO](#), and [Streeme](#). For more information about this and other programs, please visit <https://allhealthtv.com/>
